

Let us start off by giving you a warm welcome to our brand-new catalogue, which is better late than never! Only because we have spent a lot of time conjuring up the perfect stock list so that you can be satisfied with our product range.

Erith Horticulture first opened its wholesaling doors in 2004 and has been sailing forward ever since. We serve hundreds of shops all over the UK and Europe, and we always promise 100% satisfaction from our service. Our inventory is fully stocked with products that will assist your customers with their everyday growing needs. It's only right that our award-winning products are managed by the greatest horticultural sales team ever – period.

Lastly, your satisfaction and happiness are our priority. We will ensure that there is a reliable feed of communication making you feel at ease when using our service. If there are any issues or problems regarding your order, we will always find a solution and amend the situation for you. You can rest assured that everything is going to be A-Okay.

How to order

Firstly, you will have to open an account with us, this is mandatory. No account, means no sale.

To open an account with us, pick up the phone and call us on (020 8311 6111) or email us at info@erithhorticulture.com and we will email you the necessary documents.

If you cannot find what you're looking for on our catalogue, please contact us to see if we can get it in for you.

THE PRICE LIST IS ONLY AVAILABLE TO ACCOUNT HOLDERS.

FREE Next Day Delivery!

Everywhere in the UK (excluding Northern Ireland) on pallets orders over **£1,250** net.
And for parcels orders over **£750** net.

Delivery Post Code	Next Day 1/4	Next Day 1/2	Next Day Full	Economy Full

The Erith Loyalty Scheme

Because you matter.

Silver

£2,500 (net) qualifies for a good 5% discount on selected lines*.

Gold

£5,000 (net) qualifies for a great 5% discount on selected lines & a special buy 11 get 1 free*.

1/2 PRICE ON DELIVERY CHARGES ON ANYTHING ORDERED (IF NET LIMIT ISN'T REACHED).

Platinum

£10,000 (net) qualifies for a massive 7.5% discount on selected lines & a special buy 11 get 1 free*.

FREE DELIVERY ON ANYTHING ORDERED!

*Discount available on the following brands: Advanced Nutrients, Advanced of Holland, Atami, Alaska Fish, Biobizz, Flairform, FHD, Foxfarm, G.E.T. GHE, Grotek, Hesi, Moonshine, Plant Vitality, Rambridge, Rox, Superthrive.

Our Loyalty Point System

How to be on the loyalty scheme?

If you're consistently purchasing from us it is a sign of loyalty, and loyalty needs to be rewarded. That's why we have devised a system where you can enjoy hefty rewards and perks if you spend more with us.

Here's what we include:

20% on Fab pots, Plastic Pots & Pot Saucers

10% on Metals & Ducting (Y-Piece/Spigots, etc)

1 x Pallet maximum charge for deliveries on any order (e.g. If you order 3 x Pallets of soil you will only be pay for 1 x pallet).

5% on Price matched items.

Buy 11 get 1 free on Selected Brands

Further discounts available on the following brands: Advanced Nutrients, Advanced of Holland, Atami, Alaska Fish, Biobizz, Flairform, FHD, Foxfarm, G.E.T. GHE, Grotek, Hesi, Moonshine, Plant Vitality, Rambridge, Rox, Superthrive.

Loyalty Protection Service

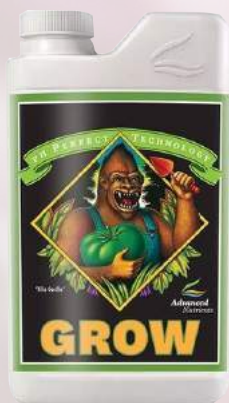

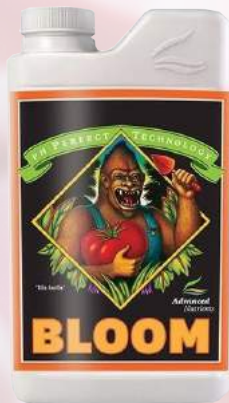

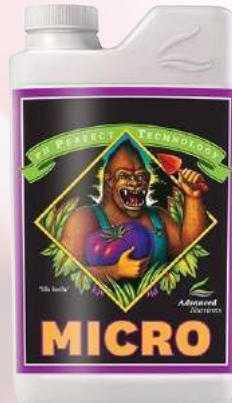

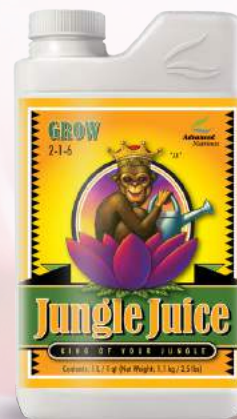

What this amazing service provides is simple yet effective, as this entails us to put a block/non-service on any new shops that tries to open within a 5 mile radius of your company. We will then notify you immediately and give you any further updates if necessary. At Erith Horticulture we can assure you that your business is in safe hands, if you are loyal to us, we will have your back 100% of the way.

Terms & Conditions 0.3:

Depending on your previous months expenditure (net), this will determine which loyalty scheme you will be placed on i.e. if your Junes net spend totals to £6,500 - this qualifies you to be on the GOLD rank of discounts.

Base Nutrients

PH Perfect - **Grow**PH Perfect - **Bloom**PH Perfect - **Micro**Jungle Juice - **Grow**Jungle Juice - **Bloom**Jungle Juice - **Micro**

One of the most important ways pH Perfect GMB gives you faster growth and bigger yields is through the special ingredients it contains that drive more of the nutrients in the formula into your plant faster than ever before.

These nutrient delivery compounds are called “chelates” which are compounds that bind with nutrients and help them get inside plants so the plant cells can use them more quickly and more efficiently.

Provides the Nitrogen, Phosphorous, Potassium, and secondary minerals necessary for the types of plants we grow to THRIVE during the all-important vegetative phase.

Gives your plants the Phosphorous, Potassium, Magnesium, and Sulfur they need to bloom big and juicy buds and give you the maximum yield!

Starts your plants off right and gives them the foundation they need by feeding them high-quality Nitrogen, Iron, Calcium, and other trace elements in the precise amounts our high-profit plants demand.

The majority of feeding charts are based on the soil medium recommendations - follow at your own discretion. Erith Horticulture is not responsible or liable for any damages to your yields. For official feeding charts please visit the manufacture website or request a feeding chart from our sales team.

Connoisseur Grow Part (A / B)

Safeguards against stresses resulting from pH fluctuations. The pH-adjusting supplements that you otherwise have to use are strong acids and alkalis – harsh chemicals to introduce to your reservoir that result in sudden changes in pH which are stressful for your plants.

Connoisseur Bloom Part (A / B)

You get extra insurance of optimal nutrition through super-absorptive chelation. In addition to pH stabilization, pH Perfect Connoisseur contains a secondary layer of protection: chelation.

Sensi Grow Part (A / B)

Not only do they perfectly balance your pH with pH Perfect technology, but they address every one of your plants' 16 elemental needs. Going far above and beyond the call of duty, Sensi is much more than your average N-P-K (nitrogen, phosphorus, potassium).

Sensi Bloom Part (A / B)

Not only do they perfectly balance your pH with pH Perfect technology, but they address every one of your plants' 16 elemental needs. Going far above and beyond the call of duty, Sensi is much more than your average N-P-K (nitrogen, phosphorus, potassium).

Sensi Coco Grow Part (A / B)

In short, as long as your water falls between 4.5 and 8.5 pH (which is pretty much everyone's water) – this technology adjusts your pH for you and keeps it buffered there throughout your plants' entire life cycle!

Sensi Coco Bloom Part (A / B)

In short, as long as your water falls between 4.5 and 8.5 pH (which is pretty much everyone's water) – this technology adjusts your pH for you and keeps it buffered there throughout your plants' entire life cycle!

Crop Substrate Superchargers

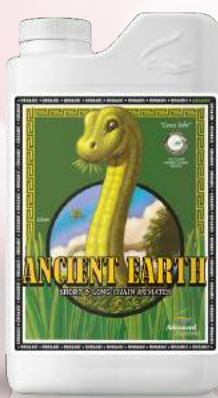

Plant Aid

Iguana Juice Organic
Grow

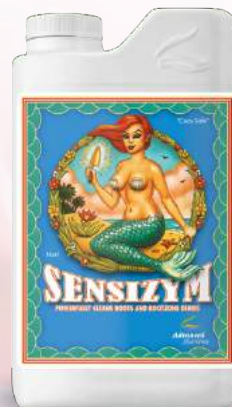

Contains the essential elements in the precise ratios and concentrations necessary for strong rooting and vibrant vegetative growth.

Iguana Juice Organic
Bloom

Has the precise ratios and concentrations of ingredients necessary for truly amazing, bud-bountiful yields.

Ancient Earth
Organics

This comprehensive plant maximizing breakthrough can be used from start to finish in your garden because it guarantees vitality in seedlings and clones, enhances floral development, and assists in more efficient utilization of nutrients and vitamins.

Sensizym

These enzymes are constantly breaking down dead roots, other organic matter, and unused nutrients. They transform them into materials that your plants use for fuel to make more vigorous growth and maximize yields.

Revive

Rejuvenating substances race into your roots, pumping them full of healing nutrition! New flowers and buds bloom... and... current flowers plump up juicy and larger than ever!

Sensi Cal Mag Xtra

Magnesium is fundamental to chlorophyll, and is directly related to the process of absorbing light. Calcium is a basic building block of cells and growth. A deficiency of either means the most important growth reactions in your plant are stunted.

Larger Yields

Big Bud

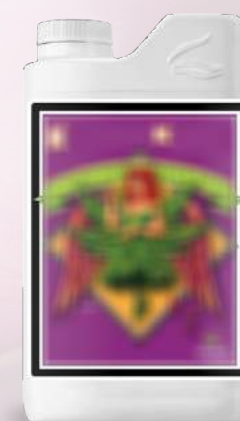

Big Bud Coco

Bud Ignitor

Overdrive

K K

If you're using fertilizers made by other companies, you're losing yield and wasting money.

One person understood this – Michael Straumietis, the man that would revolutionize hydroponics by becoming the owner of Advanced Nutrients, one of the most popular nutrient brands in the market-place.

Our products and our company have been featured in leading magazines, such as Forbes, Playboy and Rosebud.

We've got a team of top scientists working night and day to make products that will make your grow room produce bigger, tastier, and more plentiful crops.

Substances such as citric acid directly supplement cellular respiration, help your plants transfer nutrient and energy from roots to all other plant parts, and increase your plants' ability to transform sugars into energy. In addition, ascorbic acid (as ascorbate) revs up photosynthesis.

Just as bodybuilders need to take in extra protein after a workout to bulk up, your buds also crave a big protein boost. Big Bud® Coco feeds them plenty of bio-available protein so they can build size, mass, and potency while thriving in coco coir.

Bud Ignitor creates extra reserves on potassium and phosphorus that directly feed production of essential oils and flavouring compounds when your buds are swelling and ripening.

Field testing shows that Overdrive reinvigorates flowering and creates a renewed burst of resins, scents, terpenoids, size and other very desirable traits that will give you impressive harvests instead of disappointing ones.

A bloom booster specifically designed and tested to give you more potency and weight from your plants.

Nirvana

Nirvana contains a substance called "azomite." When you read the list of substances that are contained in azomite, you'll see why it's valuable for your plants.

Bud Factor X

Bud Factor X is applied with nutrients starting in the early bloom phase to trigger and maintain a higher level of resin secretion throughout the entire bloom phase.

B - 52

B-52 contains humates and other sources of plant nutrition that are more easily absorbed by your plants because they are administered with B vitamins.

Rhino Skin

Gives strength to your plants' stems, leaves, flowers, floral structures and metabolism. Safeguard your hydroponics investment by putting a coat of armour on your plants right now!

More than 1... 2... 3...

info@advancedhydro.com

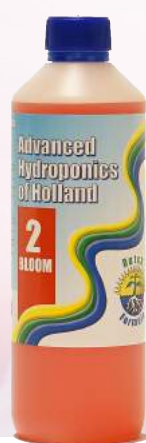

1 Grow

Dutch Formula GROW creates the ultimate conditions for crop production during the next stage. You should stop the application of GROW between 21 and 30 days after your plants have entered the twelve hour flower phase.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
1 mL/L	1 mL/L	2 mL/L	2 mL/L

Flowering Stage			
Week 1	Week 2	Week 3	Week 4
1 mL/L	1 mL/L	2 mL/L	-
Week 5	Week 6	Week 7	Week 8
-	-	-	-

Sizes	RRP (unit)	Box Quantity
500ml	£9.07	24
1L	£15.89	24
5L	£44.86	4
10L	£80.50	2

2 Bloom

The Flowering is the productive part of a plant's life. Dutch Formula BLOOM is a "power diet" for the flower production. BLOOM assures that you plants will receive the correct balance of nutrients to encourage the optimum growth of superior quality flowers.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
0.5 mL/L	0.5 mL/L	1 mL/L	1 mL/L

Flowering Stage			
Week 1	Week 2	Week 3	Week 4
2 mL/L	2 mL/L	3 mL/L	3 mL/L
Week 5	Week 6	Week 7	Week 8
3 mL/L	3 mL/L	3 mL/L	3 mL/L

Sizes	RRP (unit)	Box Quantity
500ml	£9.07	24
1L	£15.89	24
5L	£44.86	4
10L	£80.50	2

3 Micro

You will see that MICRO is the secret for success, supporting the crop during their complete life cycle. Dutch Formula MICRO consists of a strong nutrient mix of chelated micro elements, in combination with unique pH buffers, thus providing extra power and stability for growth.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
0.5 mL/L	0.5 mL/L	1 mL/L	1 mL/L

Flowering Stage

500ml	£24.00	24
1L	£44.21	24
5L	£154.25	4

Root Stimulator

Original "Root Stimulator" is used by many regular growers. "Roots Stimulator" tissue formation directly in the roots area or where the roots are beginning to form. Thanks to the "Stimulator", Roots develop faster and are much stronger.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
1 mL/L	1 mL/L	1 mL/L	1 mL/L

Sizes	RRP (unit)	Box Quantity
250ml	£13.82	24
500ml	£24.74	24
1L	£45.65	24
5L	£160.20	4

Final Solution

During the last 2 weeks before harvest it is advisable to water the plants without added fertilizers in order to obtain as pure of a final product as possible. "Final Solution" helps to decompose and remove the last residue of fertilizers in the growing media also, works as a prevention of mold. "Final Solution" can be used with any kind of growing media as the only agent to be mixed in the water.

Sizes	RRP (unit)	Box Quantity

ATAMI®

NATURALLY INNOVATING

Bloombastic

To meet this growing demand Atami B.V. has been busy since 1997 to compose the best products for you and your crop. We're constantly innovating, and we do this in a natural way. We take into account all life on our planet – and in the universe of course. Sustainability is a very important aspect to us as well.

A broad product range with a wide selection of products for any method of growing has been created. By continuously testing and improving its products, Atami can meet high quality standards.

<https://www.atami.com>

Bloombastic increases the sugar content of your crop and therefore the weight and the smell. Through an explosion of sugar and flower production Bloombastic provides thick, dense, sweet-smelling flowers.

For official feeding charts please visit the manufacture website or request a feeding chart from our sales team.

Hydro Booster Universal

Gives a natural boost to the crop during the growing and flowering period. Contains all components for the citric acid cycle. Especially developed for cultivation on hydro.

Hydro Nutrition (A + B)

Professional mineral nutrition without bulking aids. Especially developed for the cultivation on hydro. Only to be used in combination with B'Cuzz Hydro Nutrition A/B. Atami recommends the use of additives for optimal results.

Bloom Stimulator

Supports the flower/fruit development. Furthermore it also improves the smell/taste of your crop.

Root Stimulator

Supports the root production and resistance of your crop. Ideal for pre-rooted cuttings.

Silic Boost

Grow nutrition especially developed by Atami for the cultivation on recirculating hydro systems. ATA AWA Leaves A&B grow nutrient regulates the pH. Thanks to the complex adjusted formula of ATA Awa Leaves A&B, the plant is guaranteed an optimum nutrition solution during its entire growing phase.

Atazyme

Makes the absorption of nutrition easier for the plant and reduces the risk of over-fertilization. ATAzyme breaks down dead plants and root residues in the substrate and thus reduces the risk of soil diseases.

ATA Calmag

A professional and fast-acting additive, applicable on all types of substrates. ATA Calmag is a nutrient cocktail which supplies the additional calcium and magnesium that your plants require. These secondary nutrition elements are essential for an optimal growth as they have essential roles in the formation of cell walls and the absorption of light energy. Calmag is ideal when used to cultivate with soft water or water that has been demineralized. Additionally, it is an excellent additive to your regular fertilizer regime.

PK 13-14

Phosphorus (P) and potassium (K) ensures a golden ratio and is thus indispensable for a good harvest. In this respect the PK 13-14 is a must for any flowering plant. Additionally PK 13-14 ensures a healthy root system and is suitable for all crops on soil, hydro, and coco.

Rootfast

ATA Rootfast is one of the first 100% natural biomineral root stimulator that ensures a powerful root production. It increases the resistance of the plant significantly due to the keen ratio of NPK values. When used during the first two weeks, the plant will be able to grow more, larger and stronger roots.

Acti-vera

Acti·Vera has been designed to protect the immune system, increase metabolism and enhance nutrient absorption in all sorts of plants.

Algamic

Stress-free, happy plants generally produce larger fruits. And Alg·A·Mic™ comes to the rescue if they've suffered from overfeeding, deficiencies, diseases or fluctuations in temperature. It also ensures green leaves, by stimulating chlorophyll absorption

Bio-Bloom

It contains the optimum blend of nitrogen, phosphorous and potassium, along with enzymes and amino acids – all working together in perfect harmony with the soil.

Bio-Grow

This by-product of turning sugar beets or sugar cane into sugar is created by a natural fermentation process.

Bio-Heaven

Gets rid of toxins through boosting the plant's anti-oxidant system and repairs chlorophyll production.

Fish-Mix

This rich infusion of organic fish emulsion from the North Sea, mixed together with extract of Dutch sugar beet helps accelerate the growth of all living organisms in the substrate.

Now Available Organicus 99%

Organicus 99 is a premium organic liquid feed that surpasses all previous feeds available on the market.

A single part feed that's used in both growth and flower phases, making things easier for growers, whether beginner or experienced.

Not only does this organic base feed keep your plants in the sweet spot but it also aids the uptake of all nutrients available to them.

- A small amount of Citric Acid aids performance
- Super clean end product
- Easy to flush plants
- Suitable for vegetarians and vegans
- Can be used in Soil, all mixes, Coco, 60/40 and also Hydroponic systems

CANNA
The solution for growth and bloom

CANNA is the producer of nutrients and growing mediums for the cultivation of fast growing plants. Ever since the founding in the early 90s, all products are scientifically tested first, before put on the market. But even before the company was established, the founders were already scientifically pioneering with plants.

<http://www.canna-uk.com/>

Aqua Flores (A / B)

Stimulates the growth of fruits and contains all necessary elements that are required during the blooming phase. For example, the plant requires less nitrogen during the blooming phase. However, the need for potassium and phosphorous is greater.

Flowering Stage				
Week 1	Week 2	Week 3	Week 4	
-	-	3-4 mL/L	3-4 mL/L

5L	£329.18	4

Calmag Agent

Canna Calmag Agent is a buffering additive that is designed to be added to soft or RO water to make your tap water more suitable for hydroponic use.

Directions of use for buffering soft water
Shake well before use.

Fill nutrient reservoir with water (20-22°C).
Add 0.1-0.5 ml per litre CANNA CALMAG AGENT until you reach an EC of 0.45mS/cm. On top of this water you use the normal recommended nutrients and additives.

Sizes	RRP (unit)	Box Quantity
1L	£16.20	10
5L	£43.20	4
10L	£64.80	2

Canna Start

CANNA Start gives you all the micro- and macro nutritional elements for a seedling or cutting to develop into a strong healthy plant.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4

Cannacure

CANNACURE is an unique leaf nutrient that prevents and controls plant pests and mildew. It's environmentally friendly and free of toxins. CANNACURE ensures healthier plants, bigger flowers and increased yields.

User Instructions
Dilute 330 ml concentrate per 1 litre of water.
Spray minimal once a week, up until harvest
Apply using a fine sprayer, to maximise effectiveness
Use CANNACURE along with your nutrients or other feed.

Sizes	RRP (unit)	Box Quantity
1L	£23.90	10

Cannacure (RTU)

User Instructions
Spray minimal once a week, up until harvest
Apply using a fine sprayer, to maximise effectiveness
Use CANNACURE along with your nutrients or other feed.

Sizes	RRP (unit)	Box Quantity
750ml	£13.28	12

Canna Flush

When used just before harvest it makes sure the plant gets rid of all excess, which will lead to a clean and tasteful harvest. CANNA FLUSH effectively cleans the substrate without killing any useful bacteria or beneficial fungi, as can be the case when you use reverse osmosis or demineralised water. It can be used on all substrates.

Sizes	RRP (unit)	Box Quantity
250ml	£6.64	30
1L	£13.10	10
5L	£50.42	4

PK 13/14

A high grade mixture of phosphorus and potassium that is added during the flowering phase. Both elements play a big role during the generative phase of plants.

Trace Mix

Application
To be applied in the case of a trace element deficiency. As a supplementary remedy to stimulate the growth and bloom.

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Nitrogen (N) 17%

Application
To be applied as a nitrogen fertiliser, amongst others, in the case of a nitrogen deficiency (also during the generative growth phase). As a supplementary remedy to stimulate the growth.

Administration
With the nutrient solution or by means of spraying the leaves (1ml/l).

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Phosphorous (P) 20%

Application
To be applied as a phosphorus fertiliser, amongst others, in the case of a phosphorus deficiency. As a supplementary remedy to stimulate the bloom.

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Potassium (K) 20%

Application
To be applied as a potassium fertiliser, amongst others, in the case of a potassium deficiency. As a supplementary remedy to stimulate the bloom.

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Calcium (Ca) 15%

Application
To be applied as a calcium fertiliser, amongst others, in the case of a calcium deficiency. As a supplementary remedy to stimulate the growth.

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Iron (Fe) 0.1% Plus

Application
To be applied as an iron fertiliser, amongst others, in the case of an iron deficiency. As a supplementary remedy to stimulate the growth and bloom.

Dosage
Maintenance dose: 1:1500
=> 7.5 ml/10 litre
Moderate deficiency: 1:1000
=> 10 ml/10 litre
Serious deficiency: 1:500 => 20 ml/10 litre

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Mono Magnesium (MgO) 7%

Application
To be applied as a magnesium fertiliser, amongst others, in the case of a magnesium deficiency. As a supplementary remedy to stimulate the growth and bloom.

Administration
Administer in the nutrient solution or spray the leaves. Dilute 1ml/litre.

Dosage
Dilute 10-20 ml concentrate per 10 litre of water (1:1000/1:500).

Sizes	RRP (unit)	Box Quantity
1L	£13.05	12

Bio Range

Bio Boost

A yield increasing agent for all cultivation systems and can be applied in combination with all CANNA's nutritional lines and additives. BioBOOST is not a nutrient but a natural fermented plant extract with bloom stimulating characteristics that are also responsible for a fuller flavour.

Vegetative Stage

Aqua Clay Pebbles

CANNA Aqua Clay Pebbles have both high porosity and high air content which stimulate the development of strong roots that grip the substrate well. Strong roots mean bigger yields. Aqua Clay Pebbles are inorganic, have a neutral pH value, are fungus free and do not rot.

Sizes	RRP (unit)	Pallet
20L	£10.00	90
45L	£15.60	55

Coco Professional Pro Plus

CANNA Coco Professional Plus consists of 100% coco flakes. Specially selected prime Indian coconuts form the base for CANNA Coco Professional Plus. Not touching the outdoor ground in the complete production process ensures the end product is free of weeds or soil diseases. Washed in fresh water means no salts are present. This makes it the best growing medium of the future.

Sizes	RRP (unit)	Pallet
50L	£16.00	60

Coco Natural

CANNA Coco Natural is an organic product that is very lightly buffered and free of harmful viruses or soil diseases. CANNA Coco Natural has an excellent water/air system, that provides the ideal circumstances for this cultivation method. CANNA Coco Natural can be used a number of times.

Sizes	RRP (unit)	Pallet
70L	£16.00	70

Coco Pebble Mix

CANNA Coco Pebble Mix is a mixture of 60% CANNA Coco Professional Plus and 40% CANNA Aqua Clay Pebbles. Coco Professional Plus is a first-rate coco product that is made using top-quality raw materials. It has the optimum structure and purity, while CANNA Aqua Clay Pebbles are made from special types of clay that have a low soluble salt content.

Sizes	RRP (unit)	Pallet
50L	£16.00	50

Terra Professional Pro Plus

The purest potting mix possible for plant cultivation. It also gives the best effects with CANNA TERRA nutrients. The formulation is specifically developed for indoor, grow-room situations. Of course, it also gives good results outside.

Sizes	RRP (unit)	Pallet
50L	£16.00	60

Terra Professional Regular

Is a nitrogen-rich potting mix for plant cultivation. Your plants grow best in a nitrogen-rich potting mix. CANNA Terra Professional potting mix is unlike anything you will find in a garden centre. It contains a blend of upgraded black peat, granulated peat moss and perlite. If you are going to grow indoors or outdoors, this is the potting mix you want to use.

Sizes	RRP (unit)	Pallet
50L	£16.00	60

CX/HORTICULTURE

PROVEN RESULTS

**CX HORTICULTURE – FOR THE MODERN GROWER**

With all the changes occurring in growing systems, the modern grower needs a nutrient line that keeps in step with, and can adapt to, these advances. This is where the “Smart Tech” nutrients and additives from CX Horticulture UK shine. Not only are our products based on sound commercial horticultural practices, tested over many, many years of use, but are also in a constant state of being adapted to modern systems. Our “Smart Tech” fertilizers actually adapt their release and activity to plant demand. No more force feeding, resulting in soft plants and out-of-control pest and disease problems; no more starving the plants of vital nutrients. Our products are designed to work synergistically and in harmony with natural processes.

Top tier fertilizers don’t “just happen”. The experience and proven track performance we have in both commercial and hobby growing is the result of many years’ field testing, analyzing plant uptake, and high-end chemical engineering. Passion, attention to detail and truly in depth growing experience combine to bring you the best fertilizers you can possibly experience. This means that you, the grower, can rely on the nicely compact, well behaved and highly effective line that is CX Horticulture.

Flairform has been a leader in product innovation and quality since 1992. Having worked professionally in the field of water, agricultural and horticultural chemistry since 1966, our chemists have accumulated significant scientific expertise.

This expertise has enabled us to solve many of the product development challenges facing the hydroponic industry. We are now able to offer the most technically advanced products and grower advice that enables even the most inexperienced to grow like a professional.

Bud Genie

BudGenie was designed to meet the critical demands of growers wanting larger and more potent yields. Over the 2 years of final testing and commissioning, there was no other additive able to compete in terms of both volume and mass yield, flavor, cleanliness and ease-of-use. The niche ingredients used in BudGenie were proven to be uniquely stable thereby resulting in greater reliability and consistency for growers.

Bushdoctor Range

Grow Big (Hydroponics)

Grow Big® Hydroponic Liquid Plant Food is a potent, fast acting, liquid concentrate fertilizer specifically designed for hydroponic use.

Bushdoctor Micro Brew

Is a liquid suspension microbial inoculant with a complex blend of ingredients specially formulated to help plants achieve optimum microbial habitats at the root zone.

Bushdoctor Boomerang

It contains solubilized organic nutrition that is immediately available for amazingly fast recovery of stressed plants; Boomerang® can also be used as a vegetative supplement.

Bushdoctor Flower Kiss

Supplements micro nutrients that are crucial in the early flowering phase of plant growth to enhance flower development and encourage a bountiful yield. It helps to alleviate stress in the transitional period between vegetative growth and flowering.

Bushdoctor Kangeroots

Is a liquid root drench formulation designed to enhance the proliferation and root mass development of both primary and secondary roots.

Bushdoctor Sledge Hammer

Helps release surface tension in the soil which will allow for optimum absorption of moisture and nutrition throughout the plant's root system.

Gringo Rasta Zulu Charlie

Blooming Formula is a powerful fertilizer that will produce extra-large, fragrant blooms and robust fruit development. Best used in the middle to late stages of the fruiting and flowering cycle. For use in soil gardening applications.

Sizes	RRP (unit)	Box Quantity
6.8kg	£131.02	12

Gringo Rasta Will Power

Vegetative Grow Formula contains a blend of potent, fast-acting nutrients that are immediately available to plants. Will Power® is specially formulated to create compact, sturdy plants capable of supporting multiple, heavyweight blooms. For use in soil gardening applications.

Sizes	RRP (unit)	Box Quantity
6.8kg	£156.48	12

Gringo Rasta Rhize Up

Concentrated Mycorrhizae is composed of an abundance of mycorrhizal fungi and bacteria species specifically chosen for their compatibility with a variety of plants. Mycorrhiza is a powerful root enhancer that occurs naturally in forest soils where the humus content is high and the soil is thriving with microbial life. Once in contact with the plant's root system, mycorrhizae go to work right away, colonizing directly onto the roots. This activity dramatically expands both primary and secondary root development.

General Hydroponics Europe - GHE- was founded in France, in 1994 by William Texier and Noucetta (Marie) Kehdi, having gained international recognition for their hydroponic farm, the White Owl WaterFarm, where they grew crops that were served by Michelin starred restaurants in the San Francisco Bay area in the early 1990's.

William innovated from the beginning, developing new products and methods by combining the power of hydroponic technology with the qualities and ecological sensitivities of organic / Bio methods that have now become so important. Together William and Noucetta pioneered new methods of modern farming by using only the purest fertilizer ingredients.

GROTEK
SCIENCE FOR PLANTSwww.GROTEK.com

f i t @GrotekNutrients

Grotek's nutrients, a Greenstar Plant Products brand, has been providing growers with quality science and exceptional results for over 20 years. Our high-performance products have earned the trust of both hobby and commercial growers worldwide. Grotek has been an industry pioneer, combining key organic extracts with mineral fertilizers, giving growers the opportunity to vastly improving harvest quality.

Blossom Blaster

Concentrated formula for early flower development. Helps load nutrients in to developing flowering sites and a little goes a long way at only 0.1g per litre.

Flowering Stage

Instagreen provides fast acting nitrogen for crops that have exceeded available nitrogen in the root zone helping plants re-green almost immediately. Best used as a foliar spray for quick effect.

Foliar Applications: Use as a spray mist on newly rooted cuttings. Mix 10 ml per 1 L of water (2 tsp / 1 qt). Use of a wetting agent in the solution will improve leaf coverage.

Soil/Soilless/Water Culture : Mix 5 ml per 1 L of water (1 tsp / 1 qt).

Sizes	RRP (unit)	Box Quantity
1L	£18.12	6
4L	£38.23	4

Formulated for seedlings and young plants to ensure all required minerals are available during this critical phase. Minerals are fortified with a number of beneficial organic extracts to drive root growth and plant development while protecting against over and under watering.

Seedlings: Mix 2 ml per 1 L of water (½ tsp per 1.25 qt). Repeat application every 5-7 days until plants enter the vegetative growth stage, then switch to a full fertilizer program.

Rooted cuttings: Mix 2-3ml per 1 L of water (½-¾ tsp / 1.25 qt). Repeat application every 5-7 days until the plants enter the vegetative growth stage, then switch to a full fertilizer program.

Transplants: Mix 5 ml per 1 L of water (1 tsp / 1 qt). Repeat 2 weeks after first application. Ensure adequate water until plants are well established.

Sizes	RRP (unit)	Box Quantity
1L	£30.55	6
4L	£91.66	4

**LXR Gold**

Is a potassium supplement for quick results when your plants show a deficiency in potassium (brown scorching and curling of leaf tips, reduced plant growth, root development, and seed/fruit development).

Foliar spray : Use 2–4 ml of LXR Gold™ per 1 L of nutrient solution (½–1 tsp / 1.25 qt) and spray mist lightly. Use as required.

Soil/Soilless/Water Culture : Mix 1–2 ml per 1 L of nutrient solution (¼–½ tsp / 1.25 qt). Use with every nutrient feeding.

Sizes	RRP (unit)	Box Quantity
1L	£26.21	6
4L	£72.38	4
10L	£161.42	2

**Pro-Silicate**

Pro-Silicate is built to protect plants from difficult conditions like high temperatures or drought conditions.

Soil/Soilless/Water Culture: Mix 2½–5 ml per 4 L of water (½–1 tsp/gal). Check pH and adjust to 5.5–6.5 depending on crop requirements. Agitate well, then add nutrients. If necessary Pro-Silicate™ can be added to the nutrient tank after the nutrients are in the solution. Pre-dilute in a small quantity of water and add slowly while agitating.

Sizes	RRP (unit)	Box Quantity
1L	£13.46	6

Green Line Range

Rype

Crop producing plants use the last of their energy in preparation to bear fruit. For gardeners, this is the time of judgment for their hard work. This formula directly impacts the plant and also acts as a microbial catalyst with various beneficial ingredients such as amino acids, carbohydrates, and potassium.

Sizes	RRP (unit)	Box Quantity

1L	£55.01	6
4L	£177.41	4

Growth Max

GrowthMax™ is a highly concentrated cold processed kelp rich in organic compounds and minerals. This product helps plants in all stages achieve their maximum potential. The carbohydrates found in kelp also stimulate soil borne biology which in turn provides key organic compounds directly to plant roots. GrowthMax™ is a must in any garden.

Sizes	RRP (unit)	Box Quantity
500ml	£31.75	6
1L	£47.66	6
4L	£167.62	4

Root Force

Root Force™ is designed in a way as to stimulate biology, especially bacteria. Even for fungi it's a friend, because it enhances roots without added phosphorous- an element that can harm the development of mycorrhizae.

Vital

Gives growers a chance to get the level of calcium just right for their plants. As an isolated component, it is possible to dial in a precise level of calcium. The formula is also free of chlorides to ensure better health for the plant and the soil. Is a necessity when growing in Coco.

Synergy

Synergy™ is a powerful mycorrhizal fungus (*Glomus iranicum* var. *tenuihypharum*) that stimulates plant growth and productivity. Through a mutually beneficial symbiosis, mycorrhizae increase nutrient uptake and improve crop resilience, while enhancing soil quality. This proprietary strain, isolated from nature, is proven to thrive under conditions of high fertility and elevated electrical conductivity.

Strawberry	£14.88	6
Blueberry	£14.88	6
Pina Colada	£14.88	6
Regular	£14.38	6

Available in 6 scents, Final Flush™ is formulated to remove excess salt from growing media to ensure a cleaner tasting harvest. Plants tend to absorb excess nutrients and store them in plant tissues. By purging nutrients from the root zone, plants are forced to convert accumulated salts into secondary metabolites that improve harvest quality. The result is a top quality harvest with the flavour and aroma you expect.

THE POWER
Growing Edge Technologies

The majority of feeding charts are based on the soil/medium recommendations—follow at your own discretion. Erith Horticulture is not responsible or liable for any damages to your yields. For official feeding charts please visit the manufacture website or request a feeding chart from our sales team.

Growing Edge Technologies owners have been leading the industry since 1985 in the indoor gardening sector. The two people responsible for our plant food's, have over 60 years of practical experience in formulating and creating some of the best nutrient programs in the world. We searched the globe to find only the highest quality base ingredients for all our products.

As all gardeners and growers know, a plant's requirements for specific nutrients and micro-nutrients change as the plant moves through their various cycles of growth. We paid particular attention to these changing demands and designed all our products to satisfy each stage of growth - from the seedling through to the final harvest.

We offer a full line of complete nutrient programs as well as additives and boosters to complement one another. Our Let's Garden plant food boasts a rigorous two part Grow and Bloom formulas for use in soil, soil-less and hydroponic gardening scenarios. We also offer a one part "Let's Garden Series" which can be used as a stand alone food program in outdoor gardening applications and as a wonderful complement to the full nutrient program of Let's Grow and Let's Bloom formulas. Whether a heavy or light feeding crop you will be guaranteed to find the proper balance within our product lines.

Aroma Formula Veg (A / B)

Have been engineered to provide extremely fast growth with short internodes and give that added boost to help build up the overall health of your plants for fast forming during flowering stage. There are 2 forms of nitrogen in a balanced ratio that causes extremely fast growth.

Vegetation period:

Day 1 Veg:
24ml of VA and VB with 40ml of MB
Day 4 Veg:
26-28ml of VA and VB with 40ml of MB
Day 8:
28-30ml VA and VB with 40ml of MB

Keep building with ml increase until your plants are ready to flower then switch to FA & FB 2mls over where you left with VA & VB.

Sizes	RRP (unit)	Box Quantity
1L	£21.58	12
4L	£52.78	4

Aroma Formula Flowering (A / B)

Have been engineered to provide all mineral elements in a readily assumable iconic form that will cause explosive flower formation on your plants. Our ml's increasing formula will match any stage of the plants development providing you with larger flowers.

Flowering Period

Day 1
Start FA & FB 2ml over where you left off in vegetation, if VA & VB are built up to 30ml then use 32ml of FA & FB with 40ml of MB. Increase FA & FB by 2-6ml every 4 days, keeping an eye on the colour of your leaves. Once your plants are ready for harvest, use the rinse solution from 3 to 8 days.

Sizes	RRP (unit)	Box Quantity
1L	£21.58	12
4L	£52.78	4

Aroma Formula Microbase

Have been engineered to provide all micro elements in a balance form of chelates. We do not want to subject these essential micro elements to harsh conditions, such as pH swings and the strong concentrations of fertiliser salts and their acids and alkaline properties.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
4 mL/L	4 mL/L	4 mL/L	4 mL/L

1L	£14.38	12
4L	£43.13	4

Let's Bloom (A / B)

Gives your plants all the mineral elements that a demanding flowering garden needs. With a fully balance plant food, plant will have higher levels of chlorophyll and in return manufacturing more sugars and starches that end up fuelling all stages of flowering.

Flowering Stage			
Week 1	Week 2	Week 3	Week 4
3 mL/L	3 mL/L	3 mL/L	3 mL/L
Week 5	Week 6	Week 7	Week 8
3 mL/L	3 mL/L	3 mL/L	3 mL/L

Sizes	RRP (unit)	Box Quantity
1L	£23.98	12
4L	£57.58	4

Let's Grow (A / B)

Creates fast growth for cuttings or seedlings, maximizes the health of the plant, this in turn will allow larger flowers to form in flowering. Lush green leaves gives you more chlorophyll, which will allow your plants to manufacture more sugars, carbohydrates, enzymes and pigments.

Dip To Grow

Used as a foliar spray Dip To Gro will slow down the evaporation of moisture through the stomata! Cuttings will benefit from the lack of water transpiring through leaves, since they have no root system to provide adequate water. And if the cell walls collapse to much they can not rehydrate themselves. So use with confidence that your cutting success rate will improve.

Sizes	RRP (unit)	Box Quantity
1L	£16.78	12

Let's Rinse

The Rinse Solution leaches nutrients out of plants that are a week away from harvest. As a result a superior taste is created leaving behind that all too familiar bitter nutrient taste. Normally when we flush our plants with plain water, the plants must use stored up sugars, carbohydrates and vitamins, depleting the much needed elements required by the plant to fuel itself for the final week.

Sizes	RRP (unit)	Box Quantity
500ml	£16.78	12

UMPH Power

Umph Power, the elements within this bottle will cause your plants to secrete more oils! But you must first use Power to Bloom to increase flower size. Wait 4 days then use Umph Power to increase oils. By realigning the mineral elements, having them absorbing through the leaf and flowers, causes fast reaction on flowering plants to protect them self against out side elements, will create more oils.

Sizes	RRP (unit)	Box Quantity
250ml	£28.78	12

Bloody Mary

Is a PH Control nutrient stabiliser.

Hydroponics
Add 1 gram of Bloody Mary to 10L of your new nutrient solution once. Once the flowers are well formed approximately 3rd week, repeat application in 2 weeks.

Soil Application
Add 1 gram of Bloody Mary to 25L of your new nutrient solution once. Once the flowers are well formed approximately 3rd week, repeat application in 2 weeks.

Sizes	RRP (unit)	Box Quantity
300g	£120.00	24

Power to Bloom

We do not want to give too much info on this product because it works fast and everyone will be trying to copy our formulation. Used during the 3 and 5 week of flowering. May be used throughout the entire flowering period. GET recommends using only during the 3 and 5 weeks following the natural rhythm of the flowering plants.

Flowering Stage

Growth Technology has been developing innovative horticultural products since it was founded in 1985. The company has a wide range of products but nutrient solutions have always been the core of the business. In recent years there has been an increasing focus on orchids, chillies and other specialist plants – creating products for enthusiasts who understand the need for them.

Growth Technology prides itself on providing exclusive products of the highest quality, accompanied with great service, delivery and support. The company has its headquarters based in a 60,000 square foot facility on Great Western Way, just outside Taunton in Somerset.

HESI Plantenvoeding B.V. is producing and marketing plant fertilisers, plant aids and soil additives. The company is located in the southern part of the Netherlands, in Kerkrade, which is in the border region of Aachen.

High quality has been the main characteristic of Hesi's fertilisers and plant supplements from the outset. Such valuable additives as amino acids, enzymes and plant sugar turn every product into a true "source of health" for plants. Through intensive research into the secrets of plant metabolism has led to HESI successfully developing an optimally balanced composition for each phase of the plant life cycle. The result is a clearly organized range of fertilisers for universal use instead of a designated fertiliser for every single plant species!

<https://hesi.nl>

Boost

HESI Boost is a bloom activator and, at the same time, a gentle leaf fertiliser for the flowering phase. It strengthens the flowering, increases the sugar content of fruits and improves the condition of the entire plant.

Bloom Complex

HESI Bloom Complex provides all the necessary substances to flowering plants for their extra needs during flowering. Apart from the nutrition (nitrogen, phosphorus, potassium, magnesium, calcium, trace elements etc.

Flowering Stage			
Week 1	Week 2	Week 3	Week 4
5 mL/L	5 mL/L	5 mL/L	5 mL/L
Week 5	Week 6	Week 7	Week 8
5 mL/L	5 mL/L	5 mL/L	5 mL/L

Sizes	RRP (unit)	Box Quantity
1L	£12.94	12
5L	£38.64	4
10L	£62.28	2

Coco (Soft / Hard)

HESI COCO is THE fertiliser for growth and bloom on coco substrates. Like any HESI COCO thanks to complex-binding substances stabilized and free of unnecessary fiber.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
4 mL/L	4 mL/L	4 mL/L	4 mL/L

Flowering Stage			
Week 1	Week 2	Week 3	Week 4

Sizes	RRP (unit)	Box Quantity
1L	£12.84	12
5L	£35.40	4
10L	£54.84	2

Hydro Bloom (Soft / Hard)

Plants have an increased need for phosphorus as well as potassium in the flowering phase in order to create strong and healthy flowers.

Flowering Stage			
Week 1	Week 2	Week 3	Week 4
5 mL/L	5 mL/L	5 mL/L	5 mL/L
Week 5	Week 6	Week 7	Week 8
5 mL/L	5 mL/L	5 mL/L	5 mL/L

Sizes	RRP (unit)	Box Quantity
1L	£11.40	12
5L	£28.80	4
10L	£49.56	2

Hydro Grow (Soft / Hard)

HESI Hydro Growth contains proportionally more nitrogen components than HESI Hydro Bloom, because in the growth phase the plant needs more nitrogen for the production of new plant parts.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
5 mL/L	5 mL/L	5 mL/L	5 mL/L

Sizes	RRP (unit)	Box Quantity
1L	£11.40	12
5L	£28.80	4
10L	£49.56	2

Phosphorous Plus

Using Phosphorus Plus, we give plants the right means at the right moment: phosphorus for extra formation of flowers and potassium for a fast transport to the flowers.

PK 13/14

The flowering period is the culminating point in the life of a plant. The metabolism is then working at full power and large quantities of enzymes are being produced for flowering. Furthermore, the plant gets bigger and therefore needs more components.

Powerzyme

HESI PowerZyme is a cellulase-extract from the trichoderma fungus (ascomycota), which decomposes the cellulose of dead plants into recoverable dextrose. This dextrose serves as nutrition for roots and for soil flora.

Root Complex

HESI Root Complex is a plant stimulator for healthy roots. It ensures the rapid forming of new roots and creates the conditions for a functioning photosynthesis.

SuperVit

HESI SuperVit is a highly concentrated plant stimulator comprised of 15 plant-active vitamins and 10 amino acids. Vitamins and amino acids are both building blocks and biocatalysts in general metabolism.

TNT Complex

Hesi TNT Complex has a low EC value, but its degree of effectiveness is very high. Plants that are treated develop a large number of growing points and become strong and powerful with a healthy green colour.

Tap	£7.80	10
Wrench	£6.00	10

Mills is one of the first plant nutrients producers to develop a bio-mineral line. The unique formula makes use of both organic and synthetic sources in order to optimize growth rates and yield, while also providing the best flavor and aroma.

This formula is the result of a decade's worth of research, field testing and constant improvement. The formula proved to be successful when used by both large greenhouse and hobbyist growers, being an easy to use, versatile and effective booster that helped the plants reach their maximum potential. Years of trials and tribulations have led to a complete small lineup of products of unprecedented quality that are sure to provide all the nutritional elements needed. These are: Basis A and Basis B, Start-R, C4 and Ultimate PK.

The products' unique composition makes them suitable for use in all growing mediums and regardless of the watering techniques. The Bio-Mineral formula surpasses organic nutrients by providing the plants with the boost they need. Moreover, unlike entirely synthetic nutrients which can build up in or on top of the soil, Mills Bio Mineral formula does not accumulate in the medium, thus giving the grower a tremendous advantage when pushing the plants to the limit.

<http://www.mills-nutrients.co.uk/>

BASIS (A / B) Soft / Hard

Mills Basis is your staple base nutrient, designed to optimise nutritional absorption throughout your plants growth cycle. Effective across a wide pH range, this highly concentrated feed is administered in two parts – A and B.

Vegetative Stage			
Week 1	Week 2	Week 3	Week 4
1 mL/L	1 mL/L	2 mL/L	2 mL/L

20L	£67.48	2

CalMag

If you live in a soft water area, your plants could be lacking Calcium and Magnesium. Customers using reverse osmosis (RO) systems will also have a deficiency in minerals and elements which this product helps address. Mills CalMag will harden soft water and also provide the right amount of Mg and Ca while at the same time help raise EC levels to the correct range. This will improve the overall health of plants on these systems.

Sizes	RRP (unit)	Box Quantity
1L	£24.95	20
5L	£105.00	4

C4

C4 promotes the production of natural oils and sugars in your plants, encouraging an explosion of bloom in both flowers and fruit. Fruits and vegetables will be denser, harder and heavier when you incorporate Mills C4 into your plants feeding programme.

Flowering Stage			
Week 1	Week 2	Week 3	Week 4

1L	£199.95	4
5L	£640.00	2

pH- Flower

pH-Flower has been specially developed to lower the pH value of the feed water during the flowering phase.

Sizes	RRP (unit)	Box Quantity
1L	£13.95	20

pH+

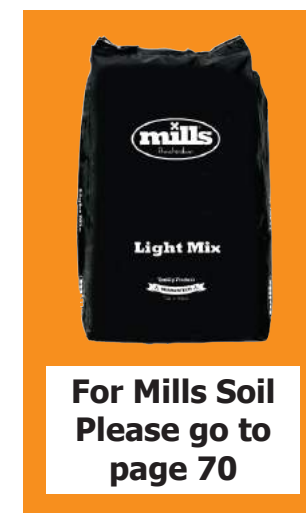

pH+ keeps the pH value of irrigation water at an ideal level. Contrary to pH-, using pH+ is not dependent on which stage of its growth cycle a crop is in. pH+ caters to keep the pH levels at a constant, somewhere between 5.8 and 6.2, and thus provides a stable and ideal environment in which the soil and the nutrients are in perfect balance.

Sizes	RRP (unit)	Box Quantity
1L	£14.95	20

Mills Starter Kit

10L	£80.00	2

The Plant Vitality range of products have been designed using state of the art Nano technology equipment in collaboration with leading British University experts and scientists in the field. We no longer just mix nutrients, we smash them. In the scientific world, Nano Particles are considered the biggest thing you'll never see.

Our Products are run through unique purpose built reactors to produce the optimum sized Nano particles.

Many years ago, the owners of Plant Vitality set out to explore possibilities of scientific breakthrough collaborating with leading bio organic engineers. Extensive research and development was worked upon in order to create the world's fastest, most effective and largest capacity topic specific Nano particle reactor. Experiments were carried out in to the effect of Nano particle products on various crops in comparison to regular product across a number of years, the results were;

- Faster growing
- Larger growing
- Heavier and denser flowers & buds
- Much Larger yields

Compared to any product ran against it. A revolution in Plant Vitality and development was born.

<https://plantvitalityltd.co.uk/>

Atomic Yield

Used as an early bloom enhancer to increase the speed of flowering plants delivering rapid bud development. Atomic yield will add size and volume to the flowers whilst enhancing the end product.

Anabolic Plant Roids Concentrate

Contains natural steroids found in plants. It can be absorbed through root or foliage. Yields increased with heavier buds and flowers.

Anabolic Plant Roids RTU

Contains natural steroids found in plants. It can be absorbed through root or foliage. Yields increased with heavier buds and flowers.

READY TO USE

BPM (Botrytis & Powdery Mildew)

Contains terpenes as active ingredients. Terpenes defend many species of plants against predators and pathogens.

BPM (Botrytis & Powdery Mildew) RTU

Contains terpenes as active ingredients. Terpenes defend many species of plants against predators and pathogens.

READY TO USE.

SUPERNATURAL BRAND

Bloom Aqua

SUPERNATURAL BRAND BLOOM AQUA Is used during the flowering stage in hydroponics to promote beautiful blooms. Bloom Aqua contains essential minerals and trace elements to support vigorous flowering. Bloom Aqua also contains 8% calcium which allows you to do without a calcium supplement and still achieve healthy, vigorous flowering growth.

Sizes	RRP (unit)	Box Quantity
400g	£37.37	20
1kg	£80.09	10

Bloom Terra

SUPERNATURAL BRAND BLOOM TERRA Is Used During The Flowering Stage To Promote Beautiful Blooms In TERRAPONICS, Soil & Soil Less Mixes.

Used during the flowering stage to promote beautiful blooms, Bloom Terra contains essential minerals and trace elements to support vigorous flowering.

Sizes	RRP (unit)	Box Quantity
400g	£37.37	20
1kg	£82.09	10

Bud Blaster

SUPERNATURAL BRAND BUD BLASTER Is a master blend of high quality ingredients that boosts plants in the flowering stage for massive & dense yields. Our leading product, SUPERNATURAL BRAND BUD BLASTER can be used along with any nutrients.

Sizes	RRP (unit)	Box Quantity
500g	£132.86	20
1kg	£235.22	10

Gro Aqua

SUPERNATURAL BRAND GRO AQUA Is Used During The Vegetative Stage In HYDROPONICS To Promote Healthy Plant Growth

Used during the vegetative stage in hydroponics to promote healthy plant growth, Gro Aqua contains essential macro and micro elements needed for proper plant development.

Sizes	RRP (unit)	Box Quantity
400g	£37.37	20

Gro Terra

SUPERNATURAL BRAND GRO TERRA Is Used During The Vegetative Stage To Promote Healthy Plant Growth In TERRAPONICS, Soil & Soil Less Mixes

Gro Terra contains essential macro and micro elements needed for proper plant development.

Sizes	RRP (unit)	Box Quantity
400g	£37.37	20

Green Stay

SUPERNATURAL BRAND GREEN STAY Used To maintain green lower leaves needed to fuel fruit production, Green Stay helps revive and refresh plants experiencing natural stress during the flowering cycle and should be used at the first sign of stress. Green Stay aids against; calcium, magnesium, and iron deficiencies.

TIP – Signs of plant stress include:
burnt leaf tips
mild plant wilt
leaf discolouration
curled leaf tips

Sizes	RRP (unit)	Box Quantity
250ml	£17.81	24
1L	£40.92	12

Quality Cure

SUPERNATURAL BRAND QUALITY CURE is a dehydrator that promotes the safe removal of water from your plants by reversing the natural transpiration process. Removing excess water before harvest helps to minimize the breakdown of essential oils and reduces drying time.

SUPERNATURAL BRAND QUALITY CURE increases fragrance, flavour & quality, leaving a vibrantly coloured finished product.

Sizes	RRP (unit)	Box Quantity
500g	£29.76	10

Super Boost

SUPERNATURAL BRAND SUPER BOOST Is Used To Promote Rooting, Early Flowering, Late Flowering & Ripening In TERRAPONICS, Soil & Soil Less Mixes.

Used to promote rooting, early flowering, late flowering and ripening, Super Boost uses high quality ingredients critical to plants in these stages of the growth cycle.

Sizes	RRP (unit)	Box Quantity
100g	£11.45	20

Super Leach

SUPERNATURAL BRAND SUPER LEACH Used to dissolve mineral build-up that causes nutrient deficiency, Super Leach gently flushes the growth medium to ensure a fresh nutrient profile throughout the growth cycle.

Sizes	RRP (unit)	Box Quantity
160g	£12.41	20
400g	£34.08	10

Superlicious

Supernatural Superlicious helps your plants reach their maximum potential in terms of nutrition, flavor and fragrance. The end result is highly nutritious produce that is both sweet and flavorful.

It contains a balanced form of over ninety highly soluble elemental compounds, some of which may be missing from your existing nutrients or not available to plants in other forms.

Application Rate: Add 1 teaspoon (6 grams) per 10 gallons of nutrient solution

Sizes	RRP (unit)	Box Quantity
500g	£89.11	10

Super Soak

SUPERNATURAL BRAND SUPER SOAK contains macro and micro nutrients essential to plant growth. It promotes the uniform spread of nutrients throughout any growth medium to enable vigorous rooting, heavy flower/fruit load and ripening. Use as directed to maximize food absorption in a stable root zone.

Sizes	RRP (unit)	Box Quantity
100g	£11.45	10

Terra Pot

Our top quality Terra-Soil, now available in the reusable, ready to use Terrapot, is a versatile medium. The Terrapot is available in 5 L, 10 L and 20 L sizes. They can be used in a wide variety of systems including wicking, flood and drain, as well as top, bottom or drip feed.

Open the Terrapot bag. Rinse with water until there is runoff at the bottom of the bag. Plant rooted seedlings or cuttings.

Sizes	RRP (unit)	Box Quantity
5L	£10.01	20

Alaska Fish Fertilizer

A low-odor formula for use indoors and out. Rich in organic matter, it breaks down slowly to feed plants and soil microbes over time. OMRI Listed for use in organic production.

DIRECTIONS FOR USE:
Apply 1-4 Tbsp per gallon of water every three weeks during the growing season. Ideal for use on all plants including vegetables, fruits, roses, shrubs, trees and container-grown gardens.

Sizes	RRP (unit)	Box Quantity
4L	£59.95	4

Alaska MorBloom

Derived from Atlantic fish, phosphoric acid and potash, Alaska MorBloom stimulates exceptional budding and blooming on all flowering plants. Brightens colors in flowers and foliage and promotes vigorous root growth, too!

DIRECTIONS FOR USE:
Mix 1-3 Tbsp per gallon of water to encourage budding in flowers, vegetables and ornamental houseplants. Apply every three weeks during the growing season.

Sizes	RRP (unit)	Box Quantity
4L	£59.95	4

Future Harvest Bud Boom

Bud Boom is a floral hardener and a finisher, designed to ripen fruits and bring out the tastes and smells locked deep down in the genetics of your plants.

The key performance benefits are weight gain, increased flower density and enhanced flavour in fruiting crops. Bud Boom is a PK additive containing sulfur and magnesium; both of which are elements that help to ripen plants off. It will show visible results quickly, with the main benefits being an increased yield and enhanced flavour. It's a final boost for your crops at the end of the cycle.

Sizes	RRP (unit)	Box Quantity
500g	£45.00	16
1kg	£70.00	16
2.5kg	£140.00	4

Future Harvest Bud Start

Bud Start is an early flower enhancer. This phosphorous-potassium booster is extremely effective in promoting a vigorous onset to a bloom cycle. It will also assist as a weight gain supplement, as well as speeding up flower set development.

When using Bud Start the size and amount of a new flower sites on a fruiting crop is increased, causing them to expand and elongate. This early PK boost speeds up and promotes a more vigorous start to flowering and has a positive effect on crop finishing times too.

Sizes	RRP (unit)	Box Quantity
500g	£120.00	16

Future Harvest Ton O Bud

Ton O Bud is one of the best selling, if not the best selling additive in Future Harvest's extensive additives range.

It is globally recognized and has a proven reputation as one of the most powerful plant enhancing additives on the market. Ton O Bud is concentrated P-K (phosphorous and potassium) additive designed to pack bulk onto flowers and fruits during the middle stages of a flowering cycle.

Sizes	RRP (unit)	Box Quantity
500g	£100.00	16
1kg	£160.00	16

Green Planet Dense

Dense Bud Compactor works because it is a huge boost of potassium applied at the right ratios at the right time. Flowers become more compact and dense, crop yields are increased, quality and shelf life are improved.

Support in photosynthesis and sugar production, increases protein content, and improved trans-location of vital fluids. Noticeable essential oil increase, and very economical.

Sizes	RRP (unit)	Box Quantity
500g	£28.00	12
1kg	£44.80	12
2.5kg	£88.80	4
5kg	£142.40	2

Green Planet Bud Booster

Bud Booster is an original bloom additive from Green Planet which, because of its high level of phosphorus, helps promote blooming and assists in the plants metabolism during the middle of the flowering stage. Bud booster simply put is a flower enhancer generally used by entry level gardeners to achieve a larger heavier crop.

Sizes	RRP (unit)	Box Quantity
500g	£32.40	12
1kg	£57.20	12
5kg	£113.60	4
10kg	£384.40	2

Green Planet Terpinator

Terpinator is a plant nutrient formulated with potassium and naturally occurring compounds. TERPINATOR® is designed to increase the concentration of terpenes in aromatic plant oils. It accomplishes this by promoting the natural enlargement of the plant's plant-oil producing resin glands while also increasing the number of gland sites.

Sizes	RRP (unit)	Box Quantity
1L	£17.60	12
4L	£59.20	4
10L	£104.00	2
23L	£224.00	1

FISH SH!T

Fish Sh!t is derived from feeding tilapia a proprietary mix of feed that when digested lends itself nicely to bacteria and microorganism production/growth under proper conditions. Fish Sh!t is the first of its kind ecosystem in a bottle. By introducing a wide variety of beneficial bacteria and microorganisms in to the rhizosphere, Fish Sh!t creates an optimal symbiotic relationship between plant and soil. Never before has a company introduced an all living biological success story to the market.

Sizes	RRP (unit)	Box Quantity
120ml	£22.95	84
250ml	£33.29	36

Gen200 - Control

A bio-mix of natural micro-elements supplemented with 100% bio-available ortho silicic acid. GEN200 Control ensures the regulation of the growth of the plants and their natural defence system. This ensures that the plants are more resistant against diseases and distresses such as extreme heat and cold. Your plants will root faster, develop stronger stems and leaves, which will result in firmer plants and bigger yields. GEN200 Control can be used on all kinds of soil and with all kinds of nutrition.

Sizes	RRP (unit)	Pack Quantity
250ml	£50.00	12
500ml	£100.00	12

Rambridge Veg Booster

Veg-Booster enables young cuttings or seedlings to better expand branches allowing for fuller growth in the later flowering stages.

Sizes	RRP (unit)	Pack Quantity
20g	£16.80	10
270g	£144.00	12

Rambridge Blossom Blood

It's been developed for pH stabilisation to maximise floral production by utilising a specific type of pH buffer salt. Blossom Blood is not to be confused with plant food, but is compatible with all quality nutrients.

Sizes	RRP (unit)	Pack Quantity
20g	£22.20	10
300g	£196.80	12
1kg	£524.81	12

Rambridge Mr No!

Mr. NO! is a specially formulated nutrient that increases the number of internodes, shortens the length between them and focuses plants' energy on lateral growth.

Sizes	RRP (unit)	Pack Quantity
250ml	£33.60	12
1L	£120.00	12

Rox Flower Enhancer

Rox is an extremely powerful flowering stimulator, formulated to trigger growth and weight gain during the bloom cycle, substantially increasing yields and overall strength and vigour.

Sizes	RRP (unit)	Box Quantity
1L	£110.00	12

Superthrive

Superthrive encourages the natural building blocks that plants normally make themselves under optimum conditions, so it gives plants a better chance of achieving their full growth potential.

Sizes	RRP (unit)	Box Quantity

Stim Root Rooting Powder

For softwood cuttings use Stim Root 1 – 0.1% Indole-3-butyric acid or IBA, ideal for softwood cuttings and easy to propagate plants. Stim-Root #1 has been proven to aid in the rooting of softwood cuttings.

For medium cuttings use Stim Root 2 Indole-3-butyric acid IBA 0.4%. Stim-Root 2 has been proven to aid in the rooting of semi-hardwood cuttings such as summer flowering shrubs, woody houseplants, Hoya etc.

Sizes	RRP (unit)	Box Quantity
#1	£8.00	12
#2	£8.00	12

The majority of feeding charts are based on the soil medium recommendations - follow at your own discretion. Erith Horticulture is not responsible or liable for any damages to your yields. For official feeding charts please visit the manufacture website or request a feeding chart from our sales team.

ROCK Resinator

Resinator is a revolutionary flower enhancer that will dramatically increase essential oil production and flower mass. Resinator provides the highest quality soluble phosphorus and potassium for translocation to flowering sites.

Sizes	RRP (unit)	Box Quantity
1L	£70.00	12
5L	£271.90	4
20L	£950.00	2

Superbud Reborn

Superbud utilises extracts from coal derived humates. Plants flowered with Superbud stop their upward growth almost immediately and start to form numerous, tight and heavy clusters of flowers that continue for many weeks.

Sizes	RRP (unit)	Box Quantity
250ml	£32.40	12
500ml	£48.00	12
1L	£84.00	12

Great White Premium Mycorrhizae

Great White's premium and concentrated formula aids optimum colonization of root systems by the fungi. The water-soluble powder makes application a snap and delivers the spores directly to the roots for immediate germination. Users should look for explosive root development, enhanced yields, fruiting and flowering, nutrient and water absorption and transplant success.

Sizes	RRP (unit)	Box Quantity
28g/1oz	£15.00	48
114g/4oz	£37.90	24

Hygrozyme

Hygrozyme is a concentrated enzyme formula for plants, do not use more than the recommended dosage. Use reverse osmosis or filtered water. Best to be mixed fresh with every nutrient mix and used up within 7 days of mixing. Hygrozyme can also be used for propagation preparation.

Use 6 mL of Hygrozyme per gallon of water to soak trays and media prior to use.

Light Mix

Light Mix is a high quality potting soil which has been moderately fertilized by Mills. Light Mix consists of perlite and sphagnum. Mills selects these mosses carefully and works with peat cuttings all over Europe. The turf that makes it through their test is shipped to Holland and, using a strict set of guidelines, are broken into small pieces and filtered. The fractions that remain is used to mix and make the line of Mills potting soils.

Sizes	RRP	Pallet
50L	£657.00	60

Cocopeat

Cocopeat is an all-around potting substrate based on coco fibres and coco gravel. It's pH neutral, environment friendly and works wonders on soil life. One of the benefits of coco fibre is that it's able to absorb vast amounts of water; water it doesn't use, so it's there for the taking. When using Cocopeat it's almost impossible for the crop to dehydrate. On top of that, Cocopeat is free from bacteria, it's dustless and it doesn't set.

Sizes	RRP	Pallet
50L	£720.00	60

Top Mix

Top Mix is a high quality potting soil which has been fertilized by Mills. Once spread over the garden, it needs no looking after. Apart from black and white peat, Top Mix also consists of perlite. This volcanic rock substance has the ability to absorb large amounts of water and oxygen. It will gradually distribute these elements and, by doing so, enrich the soil. Top Mix makes sure the crop will have all it needs at its disposal.

Sizes	RRP	Pallet
50L	£777.00	60

Soil with Cork

The soil mix is manufactured in Amsterdam from premium quality 100% natural raw ingredients and is infused with natural cork for unbeatable aeration and rapid root development. The combination of premium soil, natural cork, and top quality organic nutrients is the perfect recipe for successful cultivation of all plants, fruit and vegetables. Suitable for indoor or outdoor use, DNA mills soil mix will maximise growth as well as enhancing the natural flavours of your plants.

Sizes	RRP	Pallet
50L	£1,197.00	60

Coco with Cork

The coco mix is manufactured in Amsterdam from premium quality 100% natural raw ingredients and is infused with natural cork for unbeatable aeration and rapid root development. The combination of premium coco, natural cork, and top quality organic nutrients is the perfect recipe for the successful cultivation of plants, fruits and vegetables. Suitable for indoor or outdoor use, DNA mills coco mix will maximise growth as well as enhancing the natural flavours of your plants.

50L	£1,197.00	60

BioBizz
All Mix

This heavily pre-fertilized substrate mixture emulates a rich outdoor soil with a full micro active ecosystem. And it's been designed to have enough nutrient-fuelled power to sustain lush growth for a couple weeks, without any need to add any extra fertilizer.

Sizes	RRP (unit)	Pallet
20L	£8.35	120
50L	£18.89	65

BioBizz
Coco Mix

It's made from waste materials left over by the coconut industry, which has proven to be an ideal medium for growing plants. To become this famous substrate, the coco coir matter is first decomposed over a period of time to soften the strong fibres. This is then washed in clear water, dried and shredded to become light and airy Coco•Mix™ – which contains little moisture and a low pH of 5 or 6.

Sizes	RRP (unit)	Pallet
50L	£13.85	65

BioBizz
Light Mix

Light•Mix provides the ideal foundation for encouraging vigorous growth in seedlings, young plants and cuttings – right from the beginning. It gets the vital micro activity going as the water works with the soil, producing organic catalysts that rapidly develop root structures. Light•Mix® has also been specially blended to ensure optimal drainage throughout – an essential property if you use automatic irrigation systems.

Sizes	RRP (unit)	Pallet
20L	£6.26	120
50L	£13.46	65

Gold Label
HydroCoco 60/40

Gold Label HydroCoco is a ready to use hydroponic substrate, although aimed at Flood & Drain systems, HydroCoco can also be used in other pot based hydroponic set ups such as drippers.

Sizes	RRP (unit)	Pallet
50L	£18.46	60

Gold Label
Special Mix

Gold Label Special Mix is made using Swedish virgin white peat and high quality perlite for maximum aeration and water retention. Gold Label Special Mix is also mixed with Swedish clay, lime, minerals, trace elements and organic fertilizer to make a complete soil mix thats ready straight out of the bag.

Sizes	RRP	Pallet
50L	£900.00	60

Canna Aqua Clay Pebbles

CANNA Aqua Clay Pebbles have both high porosity and high air content which stimulate the development of strong roots that grip the substrate well. Strong roots mean bigger yields. Aqua Clay Pebbles are inorganic, have a neutral pH value, are fungus free and do not rot.

Canna Coco Natural

CANNA Coco Natural is an organic product that is very lightly buffered and free of harmful viruses or soil diseases. CANNA Coco Natural has an excellent water/air system, that provides the ideal circumstances for this cultivation method. CANNA Coco Natural can be used a number of times.

Canna Coco Professional Pro Plus

CANNA Coco Professional Plus consists of 100% coco flakes. Specially selected prime Indian coconuts form the base for CANNA Coco Professional Plus. Not touching the outdoor ground in the complete production process ensures the end product is free of weeds or soil diseases. Washed in fresh water means no salts are present. This makes it the best growing medium of the future.

Canna Coco Pebble Mix

CANNA Coco Pebble Mix is a mixture of 60% CANNA Coco Professional Plus and 40% CANNA Aqua Clay Pebbles. Coco Professional Plus is a first-rate coco product that is made using top-quality raw materials. It has the optimum structure and purity, while CANNA Aqua Clay Pebbles are made from special types of clay that have a low soluble salt content.

Canna Terra Professional Pro Plus

The purest potting mix possible for plant cultivation. It also gives the best effects with CANNA TERRA nutrients. The formulation is specifically developed for indoor, grow-room situations. Of course, it also gives good results outside.

Canna Terra Professional Regular

Is a nitrogen-rich potting mix for plant cultivation. Your plants grow best in a nitrogen-rich potting mix. CANNA Terra Professional potting mix is unlike anything you will find in a garden centre. It contains a blend of upgraded black peat, granulated peat moss and perlite. If you are going to grow indoors or outdoors, this is the potting mix you want to use.

Perlite

Perlite is an ideal compost additive as it helps to retain air in the compost which is essential for healthy root development. It helps to create an optimum balance of air and water, which makes water logging almost impossible and minimises damage to roots when transplanting. When added to compost it accelerates rooting and reduces the risk of fungal diseases.

Sizes	RRP (unit)	Pallet

AROMOZONE

WEAPON OF MASS ODOUR DESTRUCTION!

PRESENTS

- ✓ MARKET LEADER IN OZONE PRODUCTION
- ✓ TOTAL ODOUR CONTROL
- ✓ TESTED AT 100% HUMIDITY
- ✓ ANNIHILATES MORE BACTERIA AND SMELL THAN ANYTHING ON THE MARKET TODAY
- ✓ PRODUCES MORE OZONE THAN ITS PEERS
- ✓ DRAWS LESS ELECTRICITY THAN ITS PEERS
- ✓ VARIABLE SETTINGS
- ✓ WON'T HINDER A FANS PERFORMANCE UNLIKE FILTERS
- ✓ UK BUILT AND DESIGNED BY FORMER LEADING ROLLS ROYCE ENGINEER
- ✓ NO FILTRATION, ODOUR ANNIHILATION

"The Aromozone is the market leader in pollutant control, destroying odour smell bacteria and germs, it operates in hot humid climates, won't slow fans down, UK designed and manufactured, it doesn't filter, it destroys, filtration isn't the answer, the answer is the Aromozone." - Julian - Garden of Eden Barnsley

Inline Ozone sterilization devices removing mould, bacteria and odour and have been in use for a number of years but many available devices have proved unreliable being unable to continuously operate in environments due to an inability to cope with high humidity levels, inadequate design / construction and a selection of unsuitable components that are all to readily broken down by ozone.

Ozone generators are ideal for certain specific applications such as: Killing mold, Killing mildew, Killing bacteria, Odour Removal.

Ozone generators work well in removing odors from automobiles, boats and recreational vehicles. They do not mask odors; ozone generators destroy odors, never to return.

Iso-Max is a totally unique diagonal tube fan, designed to be efficient, powerful and silent. Iso-Max, like Max Fan, uses the rotor-stator system that enables it to be efficient, air performance and power consumption wise.

However, Iso-Max is a particular type of fan, because it is a fan, integrated in a silencer. It has a full-metal housing and for noise reduction, a special type of foam is added. Its low weight, strong air performance and quietness makes Iso-Max the most advanced choice for a ventilation application.

Rhino Pro Carbon Filter

The Rhino Pro Filter is constructed from Australian-mined RC412 carbon, the best in the world. The carbon is tightly packed and sealed into a high-efficiency airflow cylinder with a vortex cone in the base and a custom pore surface for maximum transference. The high-porosity carbon and lightweight aluminium make the Rhino filter smaller and easier to handle.

ExHale cultivates CO₂ 24 hours a day with no need to refill bottles or use expensive CO₂ production units. The power of ExHale lies in the mycelial mass inside the vented cultivator. The ExHale Cultivator is designed for small to medium grow spaces, or more specifically 1 ExHale Cultivator will provide 4-6 plants with the CO₂ they need. ExHale can be used for both vegetative plant growth as well as for fruit and flower production.

Sizes	RRP (unit)	Box Quantity
Regular	£35.00	8
X-Large	£55.00	4

inally, smaller indoor growers who have never had the opportunity to utilize Co₂ now have a safe, reliable, easy to set-up and cost effective product that works. Finally, larger indoor growers can put down the ppm monitors and heavy-duty tanks and let our all-natural co₂ producing ingredients take over. Simply run our hose directly to your garden and watch as your plants flourish with the benefit of our all-natural Co₂.

**BlueLab
Guardian Monitor**

The BlueLab Guardian Monitor provides 24 hour continuous reading for pH, conductivity (EC/ppm 700/TDS/CF) and temperature within a nutrient solution. Optimizing these critical parameters through a plants' growing phase helps ensure a successful crop.

Designed for indoor use, the Guardian Monitor can be mounted on a wall or hung on a support bar.

Sizes	RRP (unit)	Box Quantity
Guardian Monitor	£300.00	5+

**BlueLab
E.C. Truncheon**

If the conductivity reading is too low, your plants may not be getting enough nutrients. If the conductivity reading is too high, plants can dehydrate. Understanding the conductivity of the nutrient solution takes the guesswork out of feeding plants. It will also save you money! Using the BlueLab Truncheon Nutrient Meter is the fastest and easiest way to measure the conductivity!

Sizes	RRP (unit)	Box Quantity
Truncheon	£98.00	5+

**BlueLab
E.C. pH Pen**

A key factor that affects food uptake is whether your solution is acid or alkaline. We measure this in pH. The BlueLab pH Pen also measures the temperature of the solution, as root health is vital to the success of a crop. Temperature affects the growth rate and structure of a plant so a solution temperature of 18 - 22°C or 65 - 72°F is recommended.

Sizes	RRP (unit)	Box Quantity
pH Pen	£98.00	5+

**BlueLab
Grower's Toolbox**

The BlueLab Grower's Toolbox combines the essential tools you need to easily manage your crop by measuring the pH, conductivity (ppm) and temperature of the nutrient solution.

Sizes	RRP (unit)	Box Quantity
Toolbox	£125.00	5+

pH Metre Pen

The hand held pH pen provides a compact quick and handy way to manage the success of your crop to ensure maximum uptake of nutrients.

1000W
120~277VAC
ELECTRONIC
SWITCHABLE BALLAST

FEATURES

- F.A.T. Frequency Adapting Technology fires ALL single-ended (SE) and double-ended (DE) lamps including high-frequency DE lamps
- MH/HPS switchable up to 1000W
- Generator ready
- Delayed ignition stabilizes start-up loads and extends lamp life
- Four (4) switchable wattage settings (400W SE, 600W SE, 1000W SE, 1000W DE)
- 120/208/240/277VAC voltage sensing input
- Standard S-Type lamp connector
- LED status/wattage indicators
- Built-in fan for cooling
- 6' 120VAC power cord provided
- UL Listed for damp location
- Three (3) year warranty

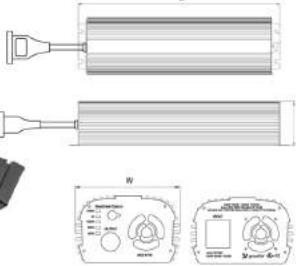

PROTECTIONS

- Short circuit
- Open circuit
- Ignition failure
- End of Lamp Life (EOL)
- Overheat
- Soft-start
- Over voltage
- Low voltage
- Fan failure

PERFORMANCE

Rated Voltage: AC90-305VAC
Input Frequency: 50/60Hz
Ambient operating temperature (TA):
Crest Factor (CF): <1.5 -40°C to 50°C
Power Factor (PF): ≥0.99
Total Harmonic Distortion (THD): <10%
Current draw: 8.6AW @ 120VAC,
4.1A @ 240VAC, 3.8A @ 277VAC

DIMENSIONS

Dimensions: L 15.2" x W 4.4" x H 2.8"

Packaged Weight: 7.4 lbs / 3.3 kgs
Installed Weight: 6.6 lbs / 3.0 kgs

Item No. **GLB-1000-DE-120/277**

315W
120~277VAC
CERAMIC METAL
HALIDE (CMH)
ELECTRONIC BALLAST

FEATURES

- Operates all 315W CMH lamps
- Soft Start stabilizes start-up loads and extends lamp life and performance
- LED status displays voltage and wattage in normal operation
- 6' 120VAC power cord provided
- 120/208/240/277VAC voltage sensing input
- Standard S-Type lamp connector
- UL Listed for damp location
- Three (3) year warranty

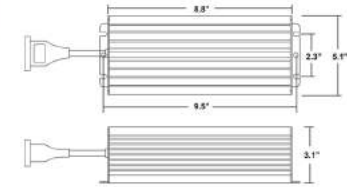

PROTECTIONS

- Short Circuit
- Open Circuit
- End of Lamp Life (EOL)
- Hot-Start
- Ignition Failure
- Overheat
- Over/Under Voltage

PERFORMANCE

Rated Voltage: AC90-305VAC
Input Frequency: 50/60Hz
Ambient Operating Temperature (TA):
Crest Factor (CF): <1.5 -25°C-50°C

HDE-E

HORTICULTURAL DOUBLE ENDED - ECONOMY

315 / 600W-1000W HORTICULTURAL DOUBLE-ENDED (DE) LAMP ECONOMY REFLECTOR

A versatile open-style grow light that combines exceptional double-ended HID lamp performance with an extremely compact, economical design. The HDE-E continues the tradition of versatility with the ability to mount the ballast remotely or right on the reflector; a 15' cord and an integral ballast mounting bracket are included with every unit. Top accessibility to the reflector and the lamp combined with our re-designed socket reduce re-lamping mishaps and make maintenance easy.

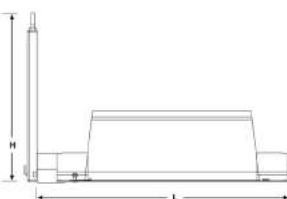

FEATURES

- Fine hammertone textured reflector with 95% reflectance provides even and intense light coverage
- Standard removable universal ballast bracket allows for integral or remote mounting of your ballast
- Self-leveling design makes mounting quick and easy
- Re-designed sockets make re-lamping easy
- Exceptional housing quality ensures reliability and durability, minimizing down time due to maintenance and cleaning
- Durable black powder coated finish

SPECS

- Constructed of heavy-duty 22 gauge steel
- 12" 16AWG ballast connector for integral ballast mount
- 15' 16AWG lamp to ballast extension cord for remote ballast mount
- One (1) pair of V-hooks for mounting
- 315W / 600-1000W HPS DE standard or high frequency lamps
- ETL Listed for damp location
- Five (5) Year Warranty

DIMENSIONS

Dimensions: L 17.5" x W 11.5" x H 4.5"
Bracket Included: L 17.5" x W 11.5" x H 19"

Packaged Weight: 9.9 lbs / 4.5 kgs
Installed Weight with Integral Ballast: 12.25 lbs / 5.5 kgs

Installed Weight without Integral Ballast: 4.5 lbs / 2.0 kgs

Item No. GLH-HDE-E

KARMA®

315-1000W HORIZONTAL LAMP CONCEALED VACUUM AIRFLOW TECHNOLOGY® REFLECTOR

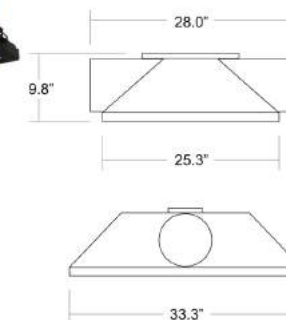

FEATURES

- Horizontal lamp with 100% light distribution allows for a low-profile hood for applications with limited overhead space
- Provides even lumen distribution without excessive dissipation, eliminating the "pyramid" effect
- Superior photometric performance creates a greater amount of uniform light nutrients
- 8" push/pull duct openings maintain 100% reflective capability and improve airflow efficiency which allows more hoods to be vented using fewer fans
- Patented reflector design creates a more than 30% improvement in light output over traditional, vented hoods
- Cooler lamps and housings reduce heat load issues and the costs associated with resolving them
- Exceptional housing quality ensures reliability and durability, minimizing down time due to maintenance and cleaning
- Durable black powder coated finish

SPECS

- Constructed of heavy-duty 22 gauge steel
- 1/8" thick tempered glass lens
- Removable door for easy lamp access and clean
- Standard with 15' cord and ballast plug
- 315W-1000W MH/HPS
- One (1) pair of V-hooks for mounting
- UL Listed for damp location
- Five (5) year warranty

DIMENSIONS

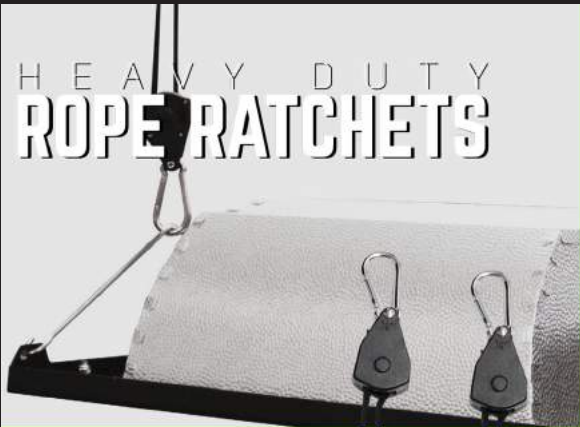

Dimensions: L 33.3" x W 25.3" x H 9.8"
Flanges & Top Housing included: L 33.3" x W 28.0" x H 9.8"

Packaged Weight: 39.0 lbs / 17.7 kgs
Installed Weight: 32.0 lbs / 14.5 kgs

HEAVY DUTY ROPE RATCHETS

HEAVY DUTY ROPE RATCHETS

FEATURES

- (2) 1/8" Rope Ratchets
- Holds reflectors, carbon filters, light fixtures and ventilation equipment
- Suited for large reflectors
- Max weight capacity - 150 lbs. (68 Kgs.)
- 8' rope

SOCKET EXTENDER MOGUL TO MOGUL PULSE-RATED PORCELAIN

SOCKET EXTENDER MOGUL TO MOGUL PULSE-RATED PORCELAIN

FEATURES

- Mogul to mogul socket extender
- Extends lamp 1-1/8"
- Designed to be used with HID lamps only
- Recommended for use with 400w and 600w lamps

Ecotechnics has been manufacturing and distributing specialist Hydroponic equipment to the trade since 1994. We have become a world leader in the market and regularly supply products and services to retailers within the UK and abroad. We stock a complete range of Hydroponic equipment which are usually supplied on a next day delivery basis within the UK. We have committed and technically proficient staff who are here to help you.

Ecotechnics continue to push the boundaries of Hydroponics. Not only in terms of price, but also in quality of service and product enhancement. Our growth over the past 15 years has been phenomenal and we look forward to bringing new cutting-edge solutions to you in 2011 and beyond.

<http://www.ecotechnics.co.uk>

Coolshades

Original Ecotechnics Coolshade reflectors are a Patented design, we designed this reflector in 1994 to allow for the easy removal of heat from directly around the lamp these reflectors are very popular for use in grow tents and also allow for the removal of heat without removing co2 from the growing area. Buy the best buy the original.

Sizes	RRP (unit)
5" coolshade 400mm	£ 39.99
6" coolshade 400mm	£ 47.99

Diamond Reflector

These were designed in conjunction with one of the countries leading photometric laboratories. Our design objective was to try and create a reflector with minimal hot spots and even light distribution over a rectangular growth area. By creating this we have seen very impressive yield increases and even plant growth with good results even in the corner area's. This reflector is a true game changer and loved by all who use it.

Sizes	RRP (unit)
315W - 600W Reflector	£ 40.00
600W - 1000W Reflector	£ 45.00

Ecotechnics IsoSlave 7 Amp EC to AC Interface

This is an EC to AC converter with the Iso-Master controller or with any standard EC Fan controller with a 0 - 10 Vdc output. Each Slave drive unit can control up to 7 Amps. This controller is designed to run fans silently on tickover or low speeds all system air AC fans that cannot be used with Phase angle type controllers. The unit is also ideal for silently running any other 230 Volt ac fans. EC type fans from the 0 - 10 Volt output.

Sizes	RRP (unit)
IsoSlave 7 Amp EC to AC Interface	£ 275.00

Ecotechnics IsoMaster Voltage fan controller

The new Iso-Master controller utilizes the latest microprocessor technology to monitor & control the levels of Temperature & Humidity in your growing area. The controller can run a Maximum of 7 Amps of fan load & also has a 0 - 10Vdc Output that can be used to run EC fans or can be connected to one or more Ecotechnics IsoSlave drive units if more than 7 Amps of load needs to be controlled.

Sizes	RRP (unit)
Voltage fan controller	£ 300.00

The Ecotechnics PowerStar Contactors have been specifically designed to allow the timed switching of horticultural lighting and appliances. In use the PowerStar Contactor is very simple and should provide years of trouble free use.

Ecotechnics Evolution
NDIR Co2 Sensor

The Evolution NDIR CO2 SensorThe new solid state evolution CO2 sensor from Ecotechnics Represents the latest state of the art sensor technology utilizing advanced solid state Indium Antimonide LED's and detectors with Precision engineered, gold plated optics to provide high accuracy fast response real time CO2 sensing from 0-10,000ppm.

Sizes	RRP (unit)
Carbon Dioxide Analyser	£275.00

Evo Temperature/
Humidity Fan
Controller

Temperature and humidity within the grow room and constantly adjusts the speed of the extraction/intake fans to maintain optimal conditions for plant growth. The unit also controls a grow room heater and is compatible with the Ecotechnics Evolution CO2 controller.This controller can control multiple fans through each channel up to a combined load of 6A (per channel).

Sizes	RRP (unit)
Evo Temperature / Humidity Fan Controller	£175.00

Evolution Co2
Controller

Setting a new benchmark for environmental control in your grow room by delivering an incredibly comprehensive feature set and unprecedented value. The controller can be used on it's own or with the Evolution Co2 sensor, it can also be used with bottled Co2 or with a suitable propane Co2 generator. The controller also comes with inbuilt fan cycle timer and light sensor.

Sizes	RRP (unit)
Ecotechnics Evolution Co2 controller	£ 230.00

Precision digital inter-
val timer 4 Amp

The new digital interval timer has many uses around the growroom. It's on or off times can be set in Seconds, Minutes or Hours.For example 12 hours off & 14 hours on or 48 hours off & 7 minutes on making it Ideal for all hydro systems or for non 24 hour flowering cycles. The timer has a standard single IEC output connector and is rated at 4 Amps total maximum load.

Sizes	RRP (unit)
Precision Digital Interval Time	£ 95.00

Evolution PPM
Controller

The New Evolution PPM Controller is an intelligent level controller for Co2 it will see many uses in growrooms and greenhouses and offers a reliable low cost solution to Co2 control. Can be used with gas regulators or propane burners long term stable co2 readings.

Sizes	RRP (unit)
Evolution PPM Controller	£ 325.00

**Ecotechnics IsoMaster
Voltage fan controller**

The Evolution sensor probe should be suspended from a suitable hanging point so as to be preferably around level with the plant tops in your growing area. The sensor probe is a sensitive piece of equipment and should be handled with care. Under no circumstance should the sensor probe be submersed in water.

Sizes	RRP (unit)
Voltage fan controller	£ 300.00

**Ecotechnics Fixed flow
rate 15Lpm regulator**

The Ecotechnics Carbon Dioxide Regulator This is the perfect Bottled Gas Regulator for use with the Evolution CO2 Controller, we have this regulator produced for us in the UK from top quality components it has a fixed flow rate of 17 Litres per Minute and is our standard horticultural regulator.

Sizes	RRP (unit)
Eco Technics Regulator	£ 95.00

**Ecotechnics Unis Co2
controller only**

User friendly CO2 Controller that's well priced and very reliable. The Unis CO2 Controller is really simple to set up and use, you simply dial in the grow room size on your Unis Controller, connect up the regulator to your gas bottle.

Sizes	RRP (unit)
Unis Co2 controller	95.00

**Ecotechnics Evolution
Full co2 Kit**

The Evolution CO2 Controller monitors CO2 Levels within the grow room and constantly adjusts the amount of CO2 to maintain ideal conditions for optimal plant growth. The Evolution controller utilizes the latest microprocessor and infra-red technology to monitor & control the levels of carbon dioxide in your growing area.

Sizes	RRP (unit)
Evoluton Full co2 Kit	£599.00

**Unis Co2 Controller
Complete Kit**

The Ecotechnics Unis CO2 Controller has been specifically designed to allow easy CO2 enrichment for home grow room and glass house horticulture, our unique approach to Gas Regulator design makes this the simplest system to set up in the world.

Sizes	RRP (unit)
Unis Co2 Controller Complete Kit	£170.00
